

Bright Beginners

Preschool

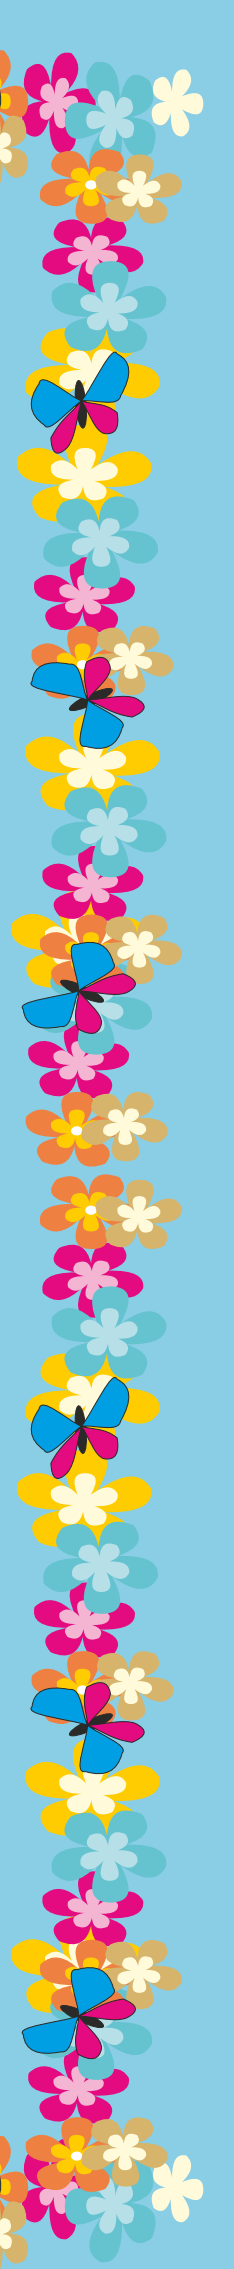

Taking small steps towards a brighter future

ABOUT US

At Bright Beginners Preschool we provide a safe, nurturing and stimulating environment for all children - we include those of different cultures and those who may be different at social or developmental levels. We allow the children to express themselves through language, creativity and physical activity, by providing an environment that is challenging and fun.

Our teachers are dedicated and energetic. They set the stage for lifelong learning and encourage the development of positive social skills that children will master as they grow. Our teachers are fully qualified early childhood educators with experience. They participate in on-going professional developmental activities and workshops to stay updated with educational trends and to adapt to the changing needs of modern children and families.

We believe that a "Prepared Environment" in the classroom is critical with a goal to provide your child with tools necessary to begin their formal education in school.

Our Curriculum

We provide a preschool which forms a foundation for learning in the future years. We instill independence, sharing, caring and overall personality development early.

Bright Beginners Preschool is a place where the child just doesn't have fun with musical sessions, practical experiences, excursions, festival celebrations and much more, it is a school which helps in proper nurturing of a child.

We follow a child centric pre-school curriculum, the purpose of which is the appropriate development of the child. It goes way beyond just song and dance routines, nursery rhymes and simple playing with toys.

Our curriculum draws inspiration from various preschool methodologies which have been translated keeping in mind, "present Indian academic and cultural context."

Our curriculum is based on 5 focus areas of development.

- **CREATIVITY:** Children are encouraged to use wide range of resources in order to express their own ideas & feeling and to construct their individual responses. Art equipment, including paint, glue, crayons as well as naturally discarded resources provides for an open ended exploration of colour, shape and texture and the development of skills in painting, drawing and collage. Role play, dramatisation and music play an equally important part in our curriculum.

- **SENSOMOTOR:** A range of equipment, both indoors and outdoors, allows the children to develop confidence in their body skills. A very high level of adult supervision enables the children to safely meet these physical challenges while developing skill and control in moving, climbing and balancing. At the same time, children are supported in the development of fine motor skills required to use tools like crayons and pencils and to handle small objects with increasing control and precision.

- **LANGUAGE:** In both small and large groups, children are encouraged to extend their vocabulary and fluency by talking and listening, and by hearing and responding to stories, songs and rhymes. Children are helped to understand that written symbol carries meaning and when they are ready to use and write themselves. A well stocked book corner gives every child the opportunity and encouragement to become familiar with books both for reference and as a source of stories and pictures.

- **COGNITIVE:** Children become familiar with sorting, matching, ordering, sequencing and counting activities which form a basis of early mathematics. Children learn to identify objects by shape, position, size, volume and number. Children are also assisted in exploring and understanding their environment, both within the group and also in the wider community.

- **PERSONALITY:** Problem solving, decision making and reasoning abilities are encouraged by means of adult supported experiences. A variety of activities are planned to give the children ample of opportunity to interact with their peers and adults to help them develop their social skills. An equal importance is given to instill independence in daily life skills during the course of the year.

Activities at a Glance!

PRIVATE TUTIONS

- Nursery, Lower KG, Upper KG
 - Classes upto Std VIII
- All Subjects including Maths, Science, Hindi, Marathi
 - Personal Attention
 - Convenient Timings

And Many More...

OTHER ACTIVITIES

Music and Movement: Along with action songs, eurhythmics and an opportunity to play and experience various musical instruments, we also give the children a chance to play the keyboard with a trained musical teacher.

Elocution: A first step is taken towards building up confidence towards public speaking. Gestures, facial expressions, voice modulation & intonations are emphasised on.

Computer Knowledge: In today's world it is equally important for children to know about the various technologies available and how to use them.

Special Days and Field Trips: A variety of days are planned to enhance learning and to expose children to a variety of out of the box learning experiences. A lot of days also involve parents so that they can spend quality time in the school.

Sports Day: It is an event that helps the children to gain agility and speed and to inculcate a sense of healthy competition.

Annual Concert: It is an event which builds confidence and allows them a chance to be on the stage and perform for the first time. It brings out their talents in music, dance and dramatics.
